**Part 3. AADTs on Unclassified Roads ordered by Local Government Area (LGA)... 105**

## EXPLANATORY NOTES

### 1.0 INTRODUCTION

This publication incorporates the results of a traffic survey undertaken during **2004** in RTA Hunter and Northern Regions as part of a three year repeating cycle covering the whole of the State of NSW.

Also incorporated are the Local Government Area changes in 2004.

- Murrurundi split between Upper Hunter (Hunter Region) and Liverpool Plains (Northern Region) (17 March 2004)
- Merriwa and Scone amalgamated to form Upper Hunter.
- Tamworth Regional Council (17 March 2004)
- Gwydir (17 March 2004)
- Clarence Valley (2 May 2004)
- Glen Innes Severn (15 September 2004).

The combined RTA Hunter and Northern Regions Traffic Volume Data is presented as PDF files on a compact disk (CD) held in a sleeve located on the inside back cover. Data for the number of prior survey years presented has been increased from seven to eleven to give data dating back to 1980. AADT data presentation has been changed from portrait to landscape orientation.

The RTA Hunter and Northern Regions Traffic Volume Data is comprised of six parts:

- Part 1. AADTs on Classified Roads ordered by Road Number
- Part 2. AADTs on Town and City Streets ordered alphabetically by Town Name
- Part 3. AADTs on Unclassified Roads ordered by Local Government Area (LGA)
- Part 4. Daily Distribution of Traffic Volumes ordered by Station Number (for permanent stations only)
- Part 5. Hourly Distribution of Traffic Volumes ordered by Station Number (for permanent stations only)
- Part 6. Traffic Volume Location Maps

**AADT is the Annual Average Daily Traffic assessed as the total volume of traffic recorded at a specific road location (known as a traffic station) taken over a calendar year and is divided by the number of days in that year.**

### 2.0 STRUCTURE

**Part 1** lists the stations and their AADT by combined directions in ascending order of Classified Road number and sequence along each road.

**Part 2** lists the stations and their AADT by combined directions grouped in alphabetical order by town and city name.

**Part 3** lists the stations and their AADT by combined directions on unclassified country roads in alphabetical order of Local Government Area (LGA) name.

**Part 4** lists the daily distribution of traffic volumes of permanent stations by day of week and week of year in order of station number.

Summary statistics presented at the foot of the **Daily Traffic Volume** table are:

- Annual average by day of week and weekly totals
- **AADT** (Annual Average Daily Traffic)
- **AAWT** (Annual Average Weekday Traffic)
- **AAWE** (Annual Average WeekEnd Traffic)
- **AAPH** (Annual Average Public Holiday Traffic)

**Part 5** lists the hourly distribution of traffic volume for a single week at each permanent station by hour of day and day of week for each direction of traffic flow. The listing includes total, average, and percentage of hourly traffic volumes for weekdays, weekends, and whole of week for each corresponding hour.

Single weeks of hourly distribution were selected to exclude public holidays and other abnormal influences where possible. Nevertheless hourly distributions may not be representative of annual average hourly traffic patterns.

Summary statistics presented at the foot of the **Hourly Traffic Volume** table are:

- Daily, weekday, weekend and weekly totals
- **MAX** (Maximum hourly flows)
- **AWT** (Average Weekday Traffic)
- **AWE** (Average Weekend Traffic)
- **ADT** (Average Daily Traffic)

**Part 6** presents the scales, indices, maps and lists of Local Government Areas and Town maps (both in alphabetical order regardless of RTA Region).

The set of maps consists of:

- Regional Map Scales
- Newcastle UBD Equivalence Table
- List of Local Government Areas
- State Index Map
- Regional Legend
- Regional Index Map
- Regional Maps
- Newcastle Index Map
- Newcastle Legend
- Newcastle Maps
- List of Town Maps and Scales
- Town Maps

Each regional map and town map displays the station locations, permanent status (if applicable) and year 2004 AADT value if available.

### 3.0 STATION TYPES & AADT DEFINITIONS

Traffic survey sites are either designated as **sample (short survey duration)** stations or as **permanent (continuous survey duration)** stations. The **AADT type** is represented during a 24-hour period averaged over a year as the number of:

- **Axle pair** passes or
- **Vehicle** passes

For example, with axle pair passes, a typical car is represented by one axle pair, a three axle truck by one and a half axle pairs and a six axle semi trailer as three axle pairs.

It should be understood that AADTs measured by counting vehicles is not equivalent to AADTs measured by axle pair passes.

AADT is measured by axle pairs at urban and rural sample stations, most rural permanent stations and a few urban permanent stations.

**AADT values in parts 1, 2 and 3 are for combined directions. Daily and Hourly traffic counts in parts 4 and 5 are indicated by a suffix to the station number:**

Eg

- N = Northbound
- S = Southbound
- E = Eastbound
- W = Westbound
- C = Combined directions (Non directional)

**4.0 MAP SYMBOLS EMPLOYED FOR TRAFFIC STATION LOCATIONS AND ASSOCIATED AADTS**

- (a) Traffic counting sites are indicated on the maps by a red dot, with a joining line to the **station number** above and **associated AADT value** below.
  
- (b) **Counting sites surveyed in 1998 or 2001, but not surveyed in 2004 are indicated on the maps without their AADT values. Sites surveyed prior to 1998 and are in the listing in the current book, but not surveyed since, are indicated on the maps by a red dot only.**

**5.0 SYMBOLS FOR TRAFFIC STATIONS STATUS & ATTRIBUTES**

The symbol (V) for AADT as vehicle counts and the symbol (\*) for AADT as axle pairs are used **EXCLUSIVELY TO INDICATE PERMANENT STATIONS.**

The symbol (V) or the symbol (\*) is affixed directly to AADT values in parts 1, 2 and 3 (only) to indicate the years and types of permanent station status and to indicate the survey years when a station changed between sample and permanent status.

The symbol (V) for vehicle counts or the symbol (\*) for axle pairs is **ALSO** affixed to station number in parts 1, 2, 3 and 6 {the symbol star (★) for maps} where a station is permanent for **AT LEAST THE 2004 SURVEY YEAR.** **On maps these star symbols are located next to the station site numbers.** No symbols are displayed in parts 4 and 5.

The symbol (V) or symbol (\*) is affixed to station number **ONLY (Not to the associated AADT values)**, where the station had permanent status for all survey years as presented in parts 1, 2 and 3.

Eg

STATION	LOCATION	MAP	Km	1986 AADT	1988 AADT	1990 AADT	1992 AADT	1995 AADT	1998 AADT	2001 AADT
*05.485	AT HUNTER RIVER BR	38	34.1	--	1351	--	1502	1528	2213*	2337*
V05.194	NEATH-AT RLY XING	40	21.2	10090	10483	10823	11106	11862*	11844V	12246V
V05.196	BRUNKRV'LE-1.6KM N OF MR392,M'SET RD	40	13.6	5001	8428	12690	12864	6944	7510	8110

*This was a sample site in 1988-1995 counting axle pairs. In 1998-2001 it was a permanent site counting **axle pairs**.*

*This was a permanent site in 1995 counting **axle pairs**. From 1998, it is still a permanent site but counting **vehicles**.*

*This "V" indicates that this station is **Permanent** in the current count year (2001), counting **vehicles**. Furthermore, since the status of this site has remained constant over the years shown in the Table, the individual traffic volume numbers are **not** individually tagged to indicate the method of data collection.*

**Symbols are not used to INDICATE SAMPLE STATIONS or AADT values, where measurement was by axle pairs.**
